## SCAN TO SAP

Biosense scans inbound invoices while MIRO (invoice verification)

### Biosense scan Vendor's invoices into SAP MIRO (Invoice Verification) GOS

We were looking for a solution that will cut down the scan process time of invoices to our SAP ERP system. We scan approximately 1000 invoices per month with around 1 minutes per invoice.

- With Scan to SAP we were able to scan and attach incoming invoices, directly from standard transaction and cut down two steps from the process.
- This resulted in a decrease time spent of scanning.
- The product implementation was extremely quick and took less than an hour.
- This product is a must for any company using SAP.
